

BRADLEY ANDREW ERCOLE

Bekasi, Indonesia | +62 895333790062 | bradleyandrewercole28@gmail.com | LinkedIn: Bradley Andrew Ercole

A passionate and dedicated full-stack developer that loves to learn and explore new things about full-stack technologies, especially MERN and MEVN stack. Have pretty solid skills in designing, developing, and testing websites performance. Proven ability to collaborate effectively with senior developers while spending the extra time to be mentored and learn. Ready to apply my skills and passion to develop good websites.

- Demonstrated proficiency in Vue.js, Next.js and Laravel through the development of a successful websites on Fiverr, showcasing my ability to deliver effective solutions that meet client requirements and drive revenue growth.

PROJECTS

Perguruan Advent 1 Jakarta's Website

Designer, Developer

Nov 2022 – Apr 2023

- Developed visually appealing websites using Figma, creating prototypes that effectively captivated and reassured school leaders about the project's vision and potential.
- Constructed a comprehensive school website that facilitated registration and provided a centralized platform for viewing all relevant activities.
- Employed Bootstrap 5 with customized CSS and SCSS to design the front-end, integrating Laravel Livewire Components, while utilizing Laravel for the back-end. Additionally, implemented a user-friendly CMS, empowering administrators to easily manage website content updates while enabling users to add new content seamlessly.

Small Clinic Website

Designer, Developer

Oct 2022 – Nov 2022

- Successfully served and provided support to approximately 200 patients by building a small clinic website. The website enabled patient registration, facilitated consultation activities between patients and doctors, and provided pharmacy services.
- Utilized native PHP to establish seamless communication with the MySQL Database, ensuring efficient storage and retrieval of patient and clinic data.
- Implemented advanced functionality using jQuery and AJAX, creating a patient search feature with auto-complete and auto-fill capabilities, enhancing the user experience and optimizing search efficiency.
